Licences verified from the Commons file-description API (`extmetadata.LicenseShortName`). CC BY images require attribution — credits are shown on the image in the prototype.

Revision 03 (2026-11-04): licences re-read from the Commons API (`extmetadata.LicenseShortName`, `Artist`). Every environment image also ships as `-1280.webp` and `-768.webp` for `srcset`; only the first hero image is fetched with high priority. A CC0 lobby photo was evaluated and rejected (a third-party building name is visible in the glass). No product image was generated or altered.

5. Not used / explicitly avoided

- Reference-site assets (Milesight, EdgeDX, Hanwha Vision, DEEPX, Bettini) — analysed only, nothing copied.
- Third-party certification logos (ISO, CE, FCC, UL, KC, TTA, ONVIF) — shown as text marks, not logos.
- AI-generated imagery — none.
